

DAVEY

APPLICATIONS

Ideal for most swimming pool applications such as:

- Filtration
- Auto pool cleaning
- Backwashing
- Water features
- Spa jet operation
- Solar pool heating

WHY CHOOSE THE Silensor® Series 50Hz pump?

Super-Quiet - Designed with a unique water-cooled motor which captures noise and vibrations, allowing super-quiet operation rated at 55 dBA. Your neighbours won't even know it's there.

Long Lasting - Silensor is designed for long service life in an outdoor, poolside environment and replaces highly corrodible metal components with high performance, long-life plastics for low maintenance and dependable service – year after year.

Dependable - Silensor incorporates unique dry run protection to minimise pump damage if no water is available to the pump. It also includes a unique mechanical seal protection for long service life and reduced maintenance.

Convenient - By water-cooling the motor, Silensor does not require air ventilation, and gives installers more flexibility with pump positioning.

- SLS models are an ideal replacement for many other pool pump models and are designed to retrofit with minimal hassle.
- SLL models feature a large leaf basket for long intervals between cleaning.
