

ATLANTIC PLASTICS is a company of

# Gunmetal Straps, Ferrules & STFS Catalogue 2013

TALIS – the number one choice for all valve-related products.

TALIS is the major brand whenever products and services are needed for the water cycle.

The brands ATLANTIC PLASTICS, BAYARD, BELGICAST, ERHARD, FRISCHHUT, SCHMIEDING, STRATE, UNIJOINT and WAFREGA are united under this name to provide a unique comprehensive service that provides the best solution for every application. Our global experience and the in-depth knowledge of our employees are the basis for TALIS' innovative strength. In our quest for new sustainable solutions, we regularly set new milestones in valve technology. And have been doing so for more than 100 years.

Our main focus is always on increasing efficiency in handling the resource water, on a long service life and economic feasibility.

TALIS products meet the most stringent quality standards and are certified all over the world.

71 Replacement Stems

# Introduction

The EBCO and Talbot ranges of Flat Boss Straps, Swivel Ferrules and Self Tapping Ferrule Straps can be used to connect PE, copper and threaded pipes to almost any type and size of mains pipe.

## Benefits

- Available in a range of self tapping ferrule straps and flat boss straps to suit mains pipes from 32mm (1")
- Ferrules are available for 1/2" to 2" / 15mm to 63mm BSP, Copper and PE outlets
- Design and selection of materials gives high strength for reliable installation and light weight for easy handling
- Quick and efficient installation onto all common pipe materials in virtually any trench condition, wet or dry
- Prolonged life of the fitting due to the high quality corrosion resistant materials used

## Safety

As with all industrial products it is important to take adequate safety precautions such as the use of adequate protective clothing like gloves, overalls, eye protection and safety footwear during installation and maintenance of this product.

## Flat Boss Straps

EBCO and Talbot Flat Boss Straps are designed for making service connections into PE, PVC, asbestos cement, cast iron, ductile iron and steel mains. A ferrule can then be inserted into the main via the strap boss using drilling and tapping equipment whilst the main is pressurised or dry. The flat boss strap range provides maximum thread engagement into the boss of the strap and tappings from 1/2" to 2" can be made into most flat boss straps. Alternatively, the strap can be pre-drilled, tapped and fitted with a ferrule prior to delivery and the wall of the pipe then simply drilled using under pressure drilling equipment.

Solid flat boss straps can also be used as blanking straps for sealing existing holes in mains after removal of a ferrule. These flat boss straps are made from corrosion resistant materials to give years of trouble free service.

*Note: flat boss straps can be supplied with a 3/8" pilot hole through the boss to help the drilling and tapping process.*

- **Quick and simple to install**  
Quick, permanent, leak free connection provided by a tried and tested design
- **Extensive Range**  
A range has been developed which enables the user to make connections to almost any type of mains pipe, either under pressure or dry
- **Robust and long lasting**  
Straps made from gunmetal are immune to corrosion and so give years of trouble free service
- **Reliable and leak free**  
Provides maximum thread engagement for leak free connections suitable for a working pressure up to 16 bar (240 psi)

## Swivel Ferrules

EBCO and Talbot Swivel Ferrules provide a quick, permanent, leak free service connection, consisting of a stem with an inner plug for valve isolation and a 360o swivel outlet at 90o to the stem. The swivel outlet provides a direct connection to the service line via an integral joint in the ferrule banjo so no adaptor is needed. These ferrules will provide service connections dry or under pressure directly into cast iron, ductile iron and steel mains. Asbestos cement, PE and PVC mains can also be tapped via a Flat Boss Strap.

- **Quick and simple to install**  
Quick, permanent, leak free connection provided by tried and tested design
- **Extensive Range**  
A range has been developed which enables the user to make connections to almost any type of mains and service pipe, either under pressure or dry
- **Robust and long lasting**  
These ferrules can provide years of service in even the most aggressive soil conditions
- **Reliable and leak free**  
Specifically designed to operate at pressures up to 16 bar (240 psi) subject to the ratings of pipe and strap if used.

## Self Taping Ferrule Straps

EBCO and Talbot Self Taping Ferrule Straps for PE, PVC and asbestos cement mains pipes incorporate an integral ferrule with a self contained cutter, eliminating the need for drilling machines. Straps are made from gunmetal or a combination of gunmetal and plastic making the product durable and corrosion resistant. The strap also uses a specially designed cutter, which tests show greatly reduces the risk of bursting a PE/PVC main or creating a swarf blockage whilst cutting.

- **No special equipment or controlled conditions needed**  
The fitting has an integrated cutter and requires only a spanner or standard ferrule key to install and carry out the drilling operation, dry or under pressure and in wet and congested trench conditions making it a viable alternative to electrofusion
- **Integral cutter**  
The integral cutter is designed to greatly reduce the risk of fracturing PE/PVC pipe during the drilling procedure. Its design also reduces the chance of swarf blockage whilst tapping by retaining the PE/PVC slug. The cutter also provides a shut off facility once the tapping has been made
- **Range of outlets**  
Self Tapping Ferrule Straps can be supplied with a variety of banjo outlet types to suit copper, male threaded and PE pipe (both barrier pipe for use in contaminated land sites and conventional PE pipe).

## Technical Data

Working Pressure <sup>1</sup> :	Up to 16 bar (240 psi)			
Temperature <sup>2</sup> :	Up to 40°C			
Sizes:	Mains pipe:	From 32mm (1")		
	Stems:	½" to 2"		
	Outlets:	Female threaded for iron pipe	½" to 2"	
		EBCO Push-Fit/Talbot Push Fit for PE	20mm (½") to 63mm (2")	
		Compression for PE	20mm (½") to 63mm (2")	
	Compression for copper	15mm to 54mm		
Materials:	Metals:	Gunmetal to BS EN 1982:2008 CC491K		
		Aluminium Bronze to BS EN 1982:2008 CC331G		
	Plastics:	Acetal or Polypropylene		
	Fasteners:	Stainless Steel (A2 and A4)		
	Seals:	Nitrile or EPDM rubber		

<sup>1</sup> The pressure stated above applies with water temperatures up to 20°C.

<sup>2</sup> For further information relating to operating temperatures please contact our Customer Service department on the telephone number shown below.
