SFA

French manufacturer since 1958, providing unique solutions for construction market and renovation projects.

KEY WORD → WASTE WATER EVACUATION PROBLEM

Before

- When it is impossible to use conventional **gravity drainage**
- When plumbing / building work is too **disruptive**
- When it is too **expensive**

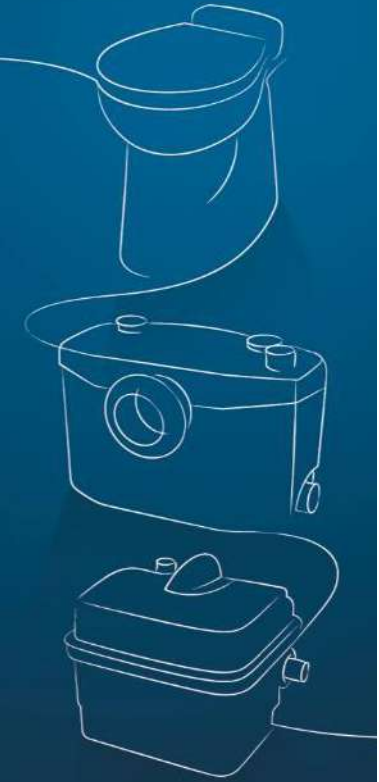

After

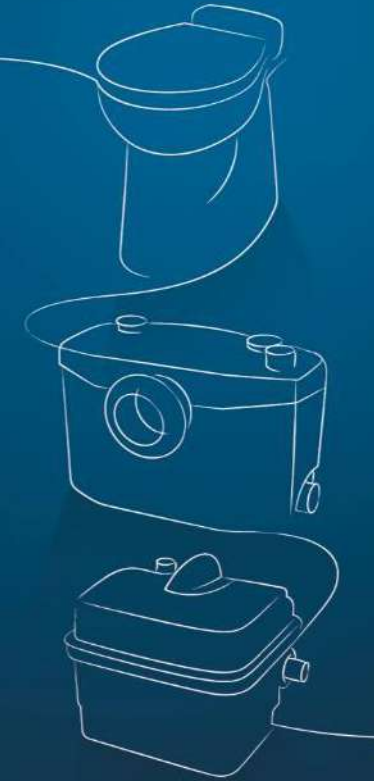

SFA – World Leader in macerators pumps

The ideal solution for installing sanitary appliances with minimal work construction and evacuate waste water up to 11m

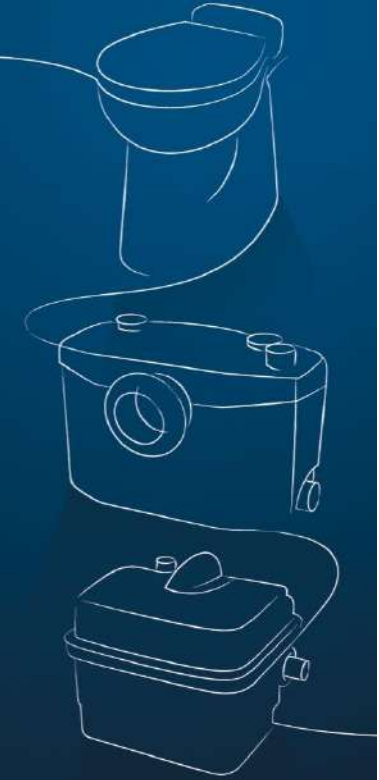

SFA – World Leader in domestic pumps

The best way to add facilities such as kitchen, shower or wash facilities anywhere you want without traditional gravity methods

SFA – Unmatched lifting station

Renovation project
Replace classical submersible pump system

New project
Avoid any pit digging

SFA – Unmatched lifting station

- No need to dig : don't seal the ground
- Grinders **or** Vortex inside
- Alarm box system included
- Extremely quiet
- Easy to reach for any access
- Discharge waste water 11 m vertically
- Extract waster water 100 m horizontally
- Maximum flow : 40 m3/h
- Easy connection to the sewage public pipe
- IP 68 technology

CHEAPER CLEANER FASTER
THAN INSTALLING ANY
SUBMERSIBLE PUMP SYSTEM

The answers to multiple requirements

No overflow risk

No smell
(close loop system)

No major work

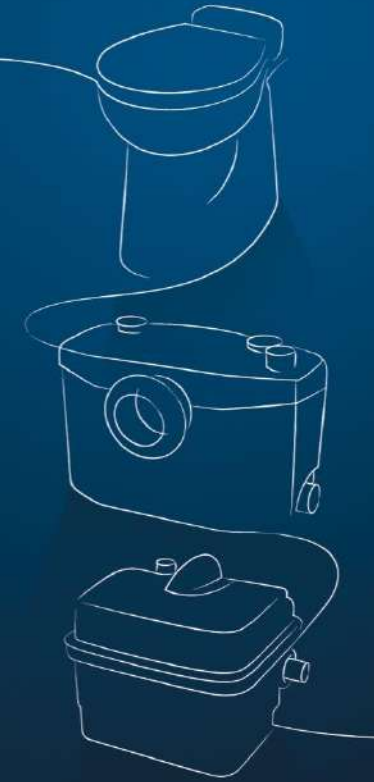

No need to maintain

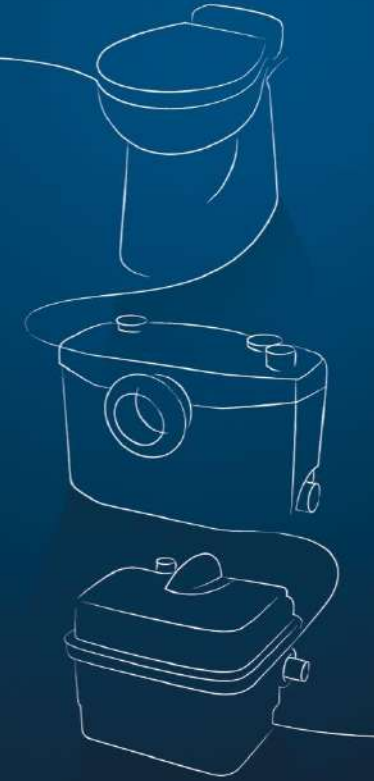

Save time & money

No obstruction risk
(grinders inside)

SFA – A.C Condensate pumps

NEW

Suitable for any Air Conditioner system
