Warranty	16

Lids and frames are manufactured from cast iron meeting ASTM A48, Class 25 (25,000 PSI tensile strength).

Top Lid Only

Frame Only

Both items make a cover.

Ford Meter Box Cover Numbering System

15" - 21" Meter Pit Covers

TYPE OF COVER

- 32B** = Adjustable Cover 11-1/2" Lid, 18" Pit Diameter
A = Inset Single Lid Cover (4" depth)
A32C = Spiked Cover 11-1/2" Lid, 18" Pit Diameter
C = Overlapping Single Lid Cover (4" depth)
KA = Flat Cover with Inset Lid
PMBC = Overlapping Single Lid Plastic Cover (4" depth)
W = Wabash Double Lid Cover (10" depth)
X = Overlapping Single Lid Hinged Cover (4" depth)

TYPE OF TOP LID OR FRAME

- C3** = Special Spiked & Adjustable Top Lid *Only*
CX = Type "C" or Type "X" Plastic Top Lid *Only*
***F** = Frame Only
WA = Wabash, Type "A", Type "KA" Top Lid *Only*

LID DETAILS

- A** = Aluminum Inner Lid with W3 Cover Instead of Plastic
-D = Recessed Plastic Inner Lid for W Style Cover with 11-1/2" Lid Opening - Standard with Plastic Lids and Lids with E-read Holes
H = Extra Heavy Lid
L = Lid Only, without Frame. The "L" will need to appear with all Lid Only part numbers.
P = Locking Plastic Lid (11-1/2" size only)
PR = Plastic Inset Lid (11-1/2" size only) - only on W, A and KA style Lids

FRAME ONLY

- HH** = Double Extra Heavy Frame with Extra Heavy Lid for Style A only

A 3 2 H H - T

LID SIZE

(This code also represents the tile size when only one digit is listed, see tile size for code representation.)

- 1** = 8"
2 = 9-1/2"
3 = 11-1/2"
4 = 11-1/2" (except X43 has a 13-1/2" lid)
5 = 15"
6 = 18"
7 = 20"
8 = 21"

TILE SIZE

(If this number is not indicated, the lid size code number designates the tile size code number also)

- 1** = 15"
2 = 18"
3 = 20"
4 = 21"
-1-4 = 15"-21" (adjustable cover with 11-1/2" lid only)

OPTIONS

- BR** = Plastic ERT Bracket (11-1/2" plastic lids and PPSC iron covers only)
LB = Large Pentagon Bolt
LL = Lockless Lid (iron lids only)
T = Single Electronic Meter Reading Lid, 2" Hole
TT = Double Electronic Meter Reading Lid, Two 2" Holes
TP = Single Electronic Meter Reading Lid, with Removable Plug
TTP = Double Electronic Meter Reading Lid, with Removable Plugs

* "F" placed before cover type code designates "Frame Only"

24" and Larger Meter Pit Covers

TYPE OF LID

- MC** = Monitor Covers
RM = Rectangular Meter Pit Covers for 2' x 3' Pits
RML = Monitor, Pit and Rectangular Top Lid ONLY

LID THICKNESS

- H** = Extra Heavy Lid
HH = Double Extra Heavy Lid

LID AND INNER LID

- MB** = Inner Lid
P = Plastic Lid (not available in extra heavy or double extra heavy)

MC - 2 4 H H - M B - T

FOR RECTANGULAR PIT COVERS

- 1** = Standard Lid
11 = Extra Heavy Lid
12 = Double Extra Heavy Lid
2 = Standard Lid with Inner Lid
21 = Extra Heavy Lid with Inner Lid
22 = Double Extra Heavy Lid with Inner Lid

FOR MONITOR COVERS

- 24** = 24" Pit Diameter
30 = 30" Pit Diameter
36 = 36" Pit Diameter

OPTIONS

- T** = Single Electronic Meter Reading Lid, 2" Hole
TT = Double Electronic Meter Reading Lid, Two 2" Holes
LB = Large Pentagon Bolt
LL = Lockless Lid

Note: See item listings in catalog section to ensure that desired sizes and options are available.

Meter Box Cover Installation, Maintenance and Safety

1. Make sure the cover, which consists of a frame and lid, fits securely onto the meter pit. Ford frames have positioning lugs extended from the bottom of the frame to prevent the cover from sliding off of the meter pit.
2. Backfill around the frame and make certain the grade remains level with, and around, the top of the cover. This will help avoid a tripping hazard.
3. Install lid onto the cover frame and lock securely into place. Locking style lids are preferred to discourage unauthorized removal, which could cause a safety hazard. If a lockless style lid is specified, make certain it is placed properly into the frame to prevent sliding or tipping out of position. Ford lockless lids have extra long positioning lugs to help ensure the lid is in place.
4. Lids and frames are designed as a compatible unit and it is not a good practice to intermingle lids and frames from various manufacturers. The incompatibility of components from other manufacturers could result in field complications and complaints. User assumes all risk of mixing Ford lids with another manufacturer's frame.
5. Check on a regular basis to ensure proper operation of locking devices and to make certain the meter box lid remains at ground level. Replace damaged components immediately. Keep components free from debris to ensure the lid seats properly. Always make sure lids are seated properly after every use to avoid injury.

Ford Electronic Meter Reading Covers

Special lids for a number of Ford cover styles are available with precast holes for remote electronic meter reading modules. These lids are especially configured for this purpose, and are manufactured so the electronic meter reading module will seat against a flat surface. Drilling a hole in a standard lid to accommodate an electronic meter reading module is not practical for many older lids, as the existing cover support ribs will interfere with the module flanges, and the drilled hole may seriously weaken the lid. Always use a special Ford lid when installing an electronic meter reading module.

To Order: For single hole electronic meter reading covers, add one catalog number suffix letter to the catalog number. For example, to add a single hole to a Wabash W32 Cover, for the installation of a single module, the catalog number would be **W32-T**. Add two T's for a double hole electronic meter reading cover, for example, **W32-TT**. See product listings in this catalog to ensure desired options are available.

A plastic inner lid with a 2" recess is standard (see page 7) in Wabash Style Electronic Meter Reading Covers with an 11-1/2" lid opening.

An optional cast iron plug, removable for future electronic meter reading module installations, is available for all electronic meter reading lids. This option is designated with a "-TP" for a single hole cover, or a "-TTP" for a double hole cover. A plastic plug is also available to improve transmission of AMR signals. See page 6.

Single Hole

Double Hole

Ford Lifter Worm Lock

All locking lids, except one-piece flat covers, feature a unique "worm" type lock. Two things happen as the key is turned and the lid is opened:

1. The hard cast iron worm rotates, applying a powerful screw-jack action between the lid and cover to break any seal of ice or dirt,
and
2. The key attaches itself to the forged silicon bronze pentagon bolt, forming a lifter handle for the lid, then automatically disengages from the lid as the cover is locked.

Pentagon Bolts

Ford supplies pentagon bolts in two sizes. The small size, known as the standard waterworks pentagon, is used on all locking covers unless the larger size is specified. To order the large bolt, add "-LB" to the catalog number.

Ford Meter Box Cover and Valve Keys

All keys are cast steel with zinc plating or e-coating. They attach automatically to bolts of lifter worm locks for lifting the lid. Curb box keys for use with curb boxes are listed in the Ford Curb Box Catalog Section GA. **Note:** KEY-3 and KEY-4 valve keys will **NOT** work with 1" and 1-1/4" upper section curb boxes. See Catalog Section GA for curb box key (Key-CB).

Ford Meter Box Cover and Valve Keys

CATALOG NUMBER	DESCRIPTION
KEY-1	Key for Standard Pentagon
KEY-1-B	Key for Large Pentagon
KEY-1-S	Key for Standard Pentagon, Slotted for Valve Tee Head

KEY-4-36	36" Long Key for Standard Pentagon on One End and Large Pentagon on Other Tee End
KEY-4-48	48" Long Key for Standard Pentagon on One End and Large Pentagon on Other Tee End

Contact factory for availability on lengths not listed.

Note: Number 3 and 4 keys for the standard pentagon bolt are slotted for valve operation.

* Keys for large pentagon bolts are not slotted for valve operation. Add "-SLOTTED" to catalog number, if needed.

Closed-Cell Insulating Discs

Insulating discs provide extra protection against meter freeze-ups. Ford Insulating Discs are made from closed-cell polyethylene foam. A tie strap handle is furnished to assist in removal. For removal purposes, insulating discs 2" and thicker are recommended for flat lids having the same diameter or larger.

CATALOG NUMBER	METER PIT DIAMETER	THICKNESS	MINIMUM R-VALUE	COLOR
CCID-15	15"	1-1/2"	6.0	Gray

CCID-36-4-2 ■		4"	8.0	Green or White

■ Two-piece with removable center access plug for viewing the meter register.

Meter Pit Insulating Blanket - FIB

The Ford Insulating Blanket, made of Minicel cross-linked polyethylene, was designed to drape over the meter setting within a meter pit. The effective and inexpensive insulating blanket traps the heat from the base of the meter pit, concentrating the heat around the meter to help prevent meter freeze-ups.

CATALOG NUMBER	DIMENSION	THICKNESS
FIB	4' x 4'	3/32"

Plastic AMR Plug **PTP or PTP-BR** U.S. Patent No. 8,350,719

The plastic AMR plug permits radio transmission to easily travel through the plug. It also prevents rodents, reptiles or debris from entering into the pit through an existing 1-27/32" or 2" AMR hole. The AMR plug with bracket (PTP-BR) is the perfect solution for utilities with EMT programs. Simply assemble the threaded plastic plug and ERT bracket within an existing AMR hole of a meter box/pit lid. Insert ERT head into bracket and you're ready for transmission.

- Black polypropylene based
- Radio transmissions are easily transferred through the plug
- ERT bracket accommodates most ERT head types

Plastic AMR Plug

CATALOG NO.	DESCRIPTION	APPROX. WT. LBS.
PTP	Removable Plastic Plug/Nut for Electronic Meter Reading Lid Hole (1-27/32" - 2" diameter hole) for Lids having a Maximum Hole Thickness of 5/8"	0.06
PTP-BR	Removable Plastic Plug for Electronic Meter Reading Lid Hole (1-27/32" - 2" diameter hole) with ERT Bracket for Lids having a Maximum Hole Thickness of 5/8"	0.10
PTP-3-25	Removable Plastic Plug/Nut for Electronic Meter Reading Lid Hole (1-27/32" - 2" diameter hole) for Lids having a Thickness Range of 1/8" to 3-1/4"	0.10
* PTP-BR-3-25	Removable Plastic Plug for Electronic Meter Reading Lid Hole (1-27/32" - 2" diameter hole) with ERT Bracket for Lids having a Thickness Range of 1/8" to 3-1/4"	0.14

* May require two plastic nuts depending on lid thickness. One nut to secure plug to the lid and the other to maintain bracket placement. (See middle illustration below.)

Plastic AMR Plug Components

CATALOG NO.	DESCRIPTION	APPROX. WT. LBS.
PLUG-300355	Plastic Lid Plug Only with 1" Threaded Post	0.04
PLUG-300354	Plastic Lid Plug Only with 3-1/2" Threaded Post	0.08
NUT-300356	Plastic Nut	0.02
BRACKET-300351	Plastic ERT Bracket	0.06

ERT Bracket

Optional ERT Bracket for Plastic Lids

The plastic ERT bracket is ultrasonically installed at the factory when ordered with a plastic lid. To order lids with the ERT bracket, add "-BR" to the end of the catalog number.

The ERT bracket may be field installed to any Ford Meter Box plastic lid having the three bracket posts on the underside of the lid by using three stainless steel clip rings. (catalog number: PBR-YJ)

Ford Wabash Double Lid Covers

The inner lid provides greater frost protection for meters. Extra depth, sloping skirt, and a 4" dead air space combine to reduce heat loss. An optional W3BPD plastic recessed inner lid, for the 11-1/2" size only, is available to accommodate taller electronic meter reading modules. The W3BPD is standard when ordering Wabash Covers with the electronic meter reading lid, single or double hole. All of the double lid covers with iron top lids have inset lids, which enhance lid stability and allows flush installations with a lawn or cement surface. An optional plastic top lid is available to allow better radio frequency travel. Lifter worm lock has standard size pentagon bolt unless larger size is specified. Inner lids are plastic in 11-1/2" size only; aluminum is optional. WA3L iron lid is available with the word "SEWER" marked on it at no extra charge.

♦ Add "-BR" to end of catalog number for factory assembled ERT bracket.

NOTE: Locking lids are supplied with a standard pentagon bolt. For an optional large bolt, add "-LB" to the catalog number. For example, a W3-LB is a W3 cover with a large bolt on the locking lid.

Ford Type A Single Lid Covers

Inset lids enhance lid stability and allow flush installations with the surface of the sidewalk or lawn. These cast iron covers are 4" in depth and include the lifter worm lock with a standard pentagon bolt unless a larger bolt is specified. An optional plastic top lid is available to allow better radio frequency travel. WA3L iron lid is available marked "SEWER" at no extra charge.

Ford PMBC-3 Plastic Meter Box Cover

PMBC-3

PMBC-3L-BR
(Lid only with ERT bracket on underside)

ERT bracket

The Ford PMBC-3 plastic meter box cover is an economical alternative to iron covers. Its light weight means reduced shipping costs and easier installation. Constructed of high strength polypropylene, which resists chemical attack and the weakening effect of ultraviolet light, the PMBC-3 fits both 18" and 20" meter pits. Plastic is an excellent insulator; the PMBC-3 provides superior protection against meter pit freeze-ups in all but the harshest climates.

Elevator Rings

ER15CX and ER3CX
Rings for Types C and
X Covers

ER25AW and ER4AW
Rings for Types A and
Wabash Covers

Elevator rings raise 11-1/2" diameter lids of Types A, C and X single lid covers and Wabash double lid covers. The ring for Types C and X covers is attached by three bronze hooks which are included. The ring for Types A and Wabash covers is held in place by integral cast lugs with locking bolts. In all cases, the lid from the cover fits the ring. Elevator rings may be stacked for a desired height. Examples include an ER15CX and an ER3CX have a combined height of 4-1/2"; an ER25AW and an ER4AW have a 6-1/2" combined height.

Ford Monitor Covers

For Large Settings

Monitor covers are designed for use on large tiles where a large lid opening is desired. They are satisfactory for 1-1/2" and 2" meters, or for two or more smaller meters. Each monitor cover consists of a flange casting to fit on the tile, a ring which is centered in place on the flange by a circular bead, and a top lid with a lifter worm lock. An optional inner lid provides added protection against frost damage in cold climates. The monitor cover is not designed to withstand traffic, but heavier lids are available for driveway installations where only lightweight traffic is likely.

NOTE: Locking lids are supplied with a standard pentagon bolt. For an optional large bolt, add "-LB" to the catalog number. For example, a MC-30-LB is a MC-30 cover with a large bolt on the locking lid.

* Lid size indicates approximate pit access opening; actual lid diameter is approximately 1" larger.

Ford Rectangular Meter Pit Covers

The rectangular pit cover consists of a heavy frame to fit a meter pit 2' x 3', a ring mounted on the frame, a 20" top lid and an optional inner lid. The assembled cover depth is 9". The rectangular pit cover is sturdy but is not recommended to withstand vehicular traffic. Extra heavy and double extra heavy top lids are optional for use under light traffic.

One or two extension plates, 2' x 3', will cover pits measuring 3' x 4' or 3' x 6'. The walls of such pits can be precast concrete, poured on the job, or laid up of bricks or blocks.

Round pit rings are available with lockless lids. For lids only, order style RML from "Top Lids Only for Monitor, Pit and Rectangular Covers."

Special Spiked Cover

This cover with inset lid fits an 18" I.D. meter box barrel. It is 4" in depth with a lid opening of 11-1/2". Lids are interchangeable with Type C lids but are inset, not overlapping. Integral cast iron anchor spikes on frame prevent settling when installed in a concrete walk or driveway.

Ford Adjustable Cover

The adjustable cover is ideal for grade changes after the initial meter pit installation. This cover fits an 18" I.D. barrel and will adjust from 1-1/2" to 5" above the top of the barrel. The lid is interchangeable with Type C lids (11-1/2" lid opening) but is inset, not overlapping. Two cut-away drawings at right show extremes of adjustability. In the far right drawing, the flange casting is inverted to place lid in as low a position as possible.
