

About Hydraloop

Hydraloop is an award-winning water recycling system that reduces water consumption by 25-45% and lowers operational costs while supporting sustainability goals without compromising performance.

Our smart technology collects and treats water from showers, baths, washing machines, and air conditioning, turning it into NSF 350 certified water for safe reuse in toilets, gardens, washing machines, and pools.

- **Flexible Integration:**
Fits new developments and retrofits in both commercial and residential buildings.
- **Low Maintenance:**
Patented filterless technology minimizes servicing.
- **Smart Monitoring:**
IoT-enabled for real-time tracking, performance insights, and remote management.
- **Regulatory & ESG Compliance:**
Supports ESG targets, aligns with CSRD, and helps meet green certifications and water efficiency regulations.

Ready to enhance your business's water efficiency?

Let's get started!

Use Water Twice
HYDRALOO

Driving Water Efficiency In Your Business
